

tachosoft mileage calculator 23.1 tachosoft mileage calculator 23.1 tachosoft mileage calculator 23.1 What is TachoSoft Mileage Calculator? TachoSoft Mileage Calculator is the world's largest digital odometer calculator and can calculate the mileage of up to 1000 different models of cars, trucks, suvs and vans at a time. TachoSoft Mileage Calculator is available in three versions. Why do you need TachoSoft Mileage Calculator? You probably think that the factory version of your car always displays the correct mileage. However, it can be that the number you see on the odometer is different from the actual mileage. The problem is that you cannot check the actual mileage because there is no way to access it. That is why TachoSoft Mileage Calculator is really useful and you should definitely download it and use it. How does TachoSoft Mileage Calculator work? TachoSoft Mileage Calculator is a really high quality software program and it has millions of copies all over the world. It can handle up to 1,000 different car models at one time. TachoSoft Mileage Calculator has the ability to completely recalculate the odometer. It calculates the mileage on a file that contains a list of all your cars and their corresponding mileage. This file is also used to calculate the remaining mileage of your car and to update the mileage displayed on your car. TachoSoft Mileage Calculator can also calculate the actual cost of your car in real-time. You can save the data in different formats and the software is constantly improving its own capabilities. The only disadvantage of the software is that you must install it on a Windows based computer. It is not possible to run it on Mac computers. However, if you can run Windows on your Mac, the software can be run through VMWare. It is a wonderful option and can be used for a variety of reasons. TachoSoft Mileage Calculator 2.1 is now available for purchase and it has a lot of new features. If you are considering buying this version, you can view the list of the new features here. Features Of TachoSoft Mileage Calculator 2.1: Application execution in Windows OS X, now it's possible. Warm startup, hot startup, full startup. Powerful features and improvements in application performance. Application settings in local and global level. 1.8 million users. Antivirus policy
